FOR IMMEDIATE RELEASE

Finally, A Direct Thermal Solution Free Of Harmful Leuco Dye, BPA, BPS and Phenol.

EASTON, PA, January 31 – Virtual Graphics LLC has introduced a new clean direct thermal label, it uses patented technology, RevealPrint®. New research reveals, more than 90% of receipts contain dangerous chemicals linked to infertility, autism and type 2 diabetes. *EcoCenter*, Receipt Paper Study 2018 - More than you Bargained For: BPS and BPA in Receipts,

www.ecocenter.org/healthy-stuff/reports/receipt-paper-study-2018.

Virtual Graphics LLC produces RevealPrint® direct thermal black & white or color labels and POS tape (better known as receipts). Our products do not require ink or ribbons and contain no Leuco Dye, BPA, BPS or Phenol.

“It's just a safer way to print”, said John V. Guzzo, Founder/CEO of Virtual Graphics LLC. “Our patented technology offers a different chemistry than traditional thermal material, our labels never fade or yellow, unlike traditional black & white thermal labels”.

RevealPrint® technology is a clean, safe option and can be applied to any pressure sensitive label application, from incoming warehouse stock labels, shipping labels, POS tape and all label applications in between.

“In addition to being a safe label, our technology also allows customers to image in multiple colors, using their thermal printer.”, said Martin K. Till, President of Virtual Graphics LLC. “Increase productivity and lower costs by using color on the labels to differentiate information in your warehousing, shipping, logistics, loading and other applications”.

Virtual Graphics LLC is a label solutions company dedicated to delivering best of class technology, quality and innovation to our customers. Our products are produced and manufactured in our Lehigh Valley facility.
